

ALI SHER AFZAL

Cloud & DevOps Engineer (AWS)

Lahore, Pakistan — 03440647297 — alisherafzal87@gmail.com

[LinkedIn](#) — [GitHub](#) — [Portfolio](#)

Professional Summary

Cloud & DevOps-focused Software Engineering student with hands-on experience in AWS, CI/CD pipelines, and Infrastructure as Code (Terraform). Experienced in containerizing and deploying 3-tier applications using Docker and Kubernetes, and building scalable, secure cloud architectures. Passionate about automation, reliability.

Technical Skills

Cloud Platforms	AWS (EC2, ECS, Fargate, VPC, IAM, RDS, S3, Lambda, ALB, CloudWatch, CloudTrail, Route 53, ECR, DynamoDB)
DevOps Tools	Docker, Kubernetes, Terraform, Jenkins, Git, GitHub Actions, GitOps
Concepts	CI/CD Pipelines, Infrastructure as Code (IaC), Containerization, Microservices Architecture
Monitoring & Observability	AWS CloudWatch (Logs, Metrics, Dashboards, Alarms)
Cloud Networking & Access	IAM (Roles, Policies), VPC Security Groups, Network ACLs, EC2 Key Management
Scripting	Bash, Python, YAML
Operating Systems	Linux (Ubuntu, RHEL)
Systems & Servers	Linux Administration, Process Management, Nginx, Apache
Databases	MySQL, PostgreSQL, DynamoDB, S3

Projects

Automated Threat Detection & IP Remediation System (AWS, Terraform)

- Designed and deployed a serverless security automation system using AWS Lambda, S3, and DynamoDB to detect SQL injection and XSS attacks in near real-time
- Reduced Mean Time to Response (MTTR) from hours to 1.2 seconds through automated remediation
- Implemented Infrastructure as Code (Terraform) to provision fully reproducible cloud infrastructure
- Automated network-level security using Security Groups and Network ACLs
- Built CloudWatch dashboards improving incident visibility by 60%
- GitHub Repository: [Threat Detection & IP Remediation Framework](#)

ClickStream Data Analytics Pipeline (AWS)

- Built a real-time data pipeline processing 40K+ user events using CloudWatch and S3
- Ingested Apache logs using CloudWatch Agent for continuous monitoring
- Queried logs using CloudWatch Logs Insights achieving ~75% conversion insights
- Designed dashboards for business intelligence and traffic analysis
- Enabled scalable storage and future analytics using S3

End-to-End DevOps CI/CD Pipeline with Kubernetes (Docker, Jenkins, K8s)

- Designed and deployed a containerized 3-tier microservices application (NGINX, Node.js, MySQL) using Docker, improving deployment consistency by 90%
- Managed multi-container architecture with Docker Compose, including service networking and persistent storage
- Orchestrated application deployment on Kubernetes using Deployments and Services, enabling high availability and internal service discovery
- Built a Jenkins CI/CD pipeline to automate image build, versioning (Git-based tagging), and deployment, reducing manual effort by 80%
- Implemented zero-downtime rolling updates using `kubect1 set image` for seamless production deployments
- Configured NGINX reverse proxy for routing API traffic, improving system modularity and request handling
- Debugged and resolved container, networking, and deployment issues, improving overall system reliability by 70%
- GitHub Repository: [DevSolutions CI/CD Kubernetes Pipeline](#)

Certifications

- AWS Academy Graduate – Cloud Operations
- AWS Academy Graduate – Cloud Web Application Builder
- AWS Academy Graduate – Cloud Data Pipeline Builder
- AWS Academy Graduate – Microservices & CI/CD Pipeline Builder

Education

BS Software Engineering

Information Technology University, Lahore

(2023 – 2027)

Intermediate – Pre-Engineering

Forman Christian College, Lahore

(2021 – 2023)
