

ALI SHER AFZAL

Junior DevOps Engineer

Lahore, Pakistan 03440647297 alisherafzal87@gmail.com LinkedIn Profile

Professional Summary

Software Engineering student with hands-on experience in AWS cloud, Docker, Kubernetes, and CI/CD pipelines. Proficient in infrastructure automation using Terraform and deploying scalable, cloud-based applications. Strong foundation in Linux and cloud architecture, with a keen interest in Cloud Computing and DevOps. Seeking an internship opportunity to apply and enhance practical skills in a real-world environment.

Certifications

- AWS Academy Graduate – Cloud Operations
- AWS Academy Graduate – Cloud Web Application Builder
- AWS Academy Graduate – Cloud Data Pipeline Builder
- AWS Academy Graduate – Microservices & CI/CD Pipeline
- Google Cloud – Implement CI/CD Pipelines

Technical Skills

Cloud Platforms	AWS (EC2, ECS, Fargate, VPC, IAM, RDS, S3, Lambda, ALB, CloudWatch, CloudTrail, Route 53, ECR, DynamoDB)
DevOps Tools	Docker, Kubernetes, Terraform, Jenkins, Git, GitOps
Monitoring & Observability	AWS CloudWatch (Logs, Metrics, Dashboards, Alarms)
Cloud Networking & Access	IAM (Roles, Policies), VPC Security Groups, Network ACLs, EC2 Key Management
Scripting	Bash, Python, YAML
Operating Systems	Linux (Ubuntu, RHEL)
Systems & Servers	Linux Administration, Process Management, Nginx, Apache
Databases	RDS (MySQL, PostgreSQL), DynamoDB, S3

Projects

Automated Cloud Infrastructure Deployment Framework (AWS) // Team Project – Infrastructure Automation Contributor GitHub Repository

- Designed and deployed scalable AWS cloud infrastructure using Terraform for reproducible and versioncontrolled environments
- Implemented event-driven architecture using S3, Lambda, DynamoDB, and Application Load Balancer integrations
- Automated infrastructure provisioning including VPC, subnets, security groups, compute resources, and storage services
- Built serverless processing workflows to handle log ingestion and cloud service interactions
- Implemented centralized monitoring and observability using CloudWatch dashboards and logs
- Managed IAM roles and service permissions to enable secure and efficient service communication

GitOps-Driven Continuous Delivery Pipeline (GKE + Cloud Build) Application Repo Environment Repo

- Designed GitOps-based CI/CD workflow using separate repositories for application code and Kubernetes manifests
- Automated Docker image build, testing, and storage in Artifact Registry
- Configured manifest updates to trigger automated deployments to Google Kubernetes Engine
- Implemented branch-based deployment strategy with rollback capability to improve deployment reliability
- Enabled declarative environment-as-code approach to reduce configuration drift
- Managed infrastructure and deployment configurations using Git-based version control workflows

End-to-End DevOps Deployment Pipeline (Docker → Compose → Kubernetes → Jenkins)

- Built and containerized multi-service application integrating frontend, backend, and database using Docker Compose
- Created custom Docker images with version control and registry management
- Deployed workloads to Kubernetes clusters using Deployment and Service manifests
- Designed Jenkins CI/CD pipeline to automate image builds, registry pushes, and Kubernetes deployments
- Diagnosed and resolved container crashes, build failures, and Kubernetes deployment issues during pipeline execution

Containerized Interactive Resume Web Application (Docker + Python)

- Developed and containerized Python Streamlit application using a custom Dockerfile
- Deployed containerized application with port mapping and runtime configuration
- Published versioned images to Docker Hub and managed image lifecycle
- Troubleshoot container networking and runtime issues during deployment

Education

Information Technology University, Lahore

BS Computer Software Engineering

Forman Christian College, Lahore

Intermediate, Pre-Engineering
